<b>Confezioni - Packaging</b>	1	1

I Colori Apiombici Ventilati sottocristallina sono colori di nuova concezione, sottoposti a processo di superventilazione risultano estremamente idonei per applicazione a pennello.

Sono perfettamente miscelabili fra loro anche a secco e particolarmente indicati per pigmentare smalti bianchi o cristalline.

#### PREPARAZIONE- APPLICAZIONE-COTTURA

Miscelare con acqua, setacciare ed applicare a pennello, spugna o tampone.

Applicazione ad aerografo solo per uso professionale.

Temperatura di cottura: 950°-980°C (cono Orton 08-07).

*These Underglaze Colours are totally lead-free and have undergone such an ultra refined special process to be perfectly brushable. They can be dry-mixed with each other and they also are suitable for colouring glazes and transparent glazes.*

#### PREPARATION-APPLICATION-FIRING

*Mix with water and apply by brush, sponge, or stamping. Sifting always recommended.*

*Airbrush application for professional use only.*

*Firing temperature: 950°-980°C (Orton cone 08-07).*
